Flight Instructor – CFI/CFII

As a Flight Instructor it is your responsibility to safely teach and effectively motivate students. Our flight instructors are held to the highest standards. We will prepare you to meet the rising demands of the helicopter industry by providing flight instructors who have experience working not only as flight instructors but also commercial pilots.

In addition to being a skillful pilot you must obtain an understanding of how people learn and what motivates them as individuals. During this course, you will be paired with our Chief Pilot in order to ensure you are provided with the highest degree of instruction. Most of your time will be spent preparing lesson plans and applying instructional techniques both in the classroom and cockpit. Your instructor will walk you through each lesson until you are confident in your abilities to teach.

In order to be considered for hire at HeliBlock, the student must obtain and hold a CFII rating. Although we cannot promise employment at Heliblock, we guarantee your training will provide you with the skills needed for a successful career in the helicopter industry.
